## COBA PLATFORM EXPANDED TO SUPPORT DALI LIGHTING SYSTEMS

The COBA Building Operating System (BOS) platform is expanded to support DALI lighting systems. The new driver enables integration of DALI systems with the COBA platform through DALI-RS232 gateway.

COBA BOS is a generic software platform for integration and interoperability of building management and security systems. The platform expands through drivers to include new systems and protocols.

DALI, Digital Addressable Lighting Interface, is a protocol for lighting systems originally set out in the technical standard IEC 62386.

### About COBA

COBA Building Operating System (BOS) is a generic software platform for integration and interoperability of all building systems. Standard based COBA BOS Framework definitions form the foundation of the platform. COBA International Ltd facilitates and coordinates further development of the platform, authorizes new COBA drivers, offers development services and provides technical support for COBA developers.
