## COBA EDITOR TO SMOOTHE IMPLEMENTATION OF COBA CONNECTED SYSTEMS

The new software tool COBA Editor will drastically improve the implementation of COBA connected systems. The COBA Editor includes a selection of libraries and templates for convenient graphics creation to different systems. New templates are easy to create in the COBA Editor. The COBA Editor also supports modeling: The model of the building, its systems and devices is done very efficiently using the COBA Editor. Modeling enables several advanced features, such as automatically generated user interfaces for a variety of media. The COBA Data Model has been defined in accordance with the standard IFC model to ensure compatibility with BIM and design standards.

COBA compliant systems include a variety of systems and devices, ranging from home automation to building automation and demanding security systems. The COBA BOS platform expands through drivers to a wide range of existing and future systems and protocols.

### About COBA

COBA Building Operating System (BOS) is a generic software platform for integration and interoperability of all building systems. Standard based COBA BOS Framework definitions form the foundation of the platform. COBA International Ltd facilitates and coordinates further development of the platform, authorizes new COBA drivers, offers development services and provides technical support for COBA developers.
