M-BUS DRIVER TO EXPAND INTEROPERABILITY OF THE COBA PLATFORM

The open COBA Building Operating System (BOS) platform is expanded to support M-BUS protocol. COBA BOS is a generic software platform for integration and interoperability of building management and security systems. The platform expands through drivers to include new systems and protocols. The new driver for M-BUS enables integration of M-BUS compliant systems with the COBA platform.

The M-Bus ("Meter-Bus") is a European standard for remote reading of heat meters, also commonly used for other types of consumption meters.

About COBA

COBA Building Operating System (BOS) is a generic software platform, which facilitates integration and interoperability of all building systems. Standard based COBA BOS Framework definitions form the foundation of the platform. COBA International Ltd facilitates and coordinates further development of the platform, authorizes new COBA drivers, offers development services and provides technical support for COBA developers.
